OUTFITTING A WARSHIP

CHOPPING THE ROPE OF THE SHELLS BEFORE HaulING

READY TO BE LOADED INTO THE AMMUNITION HOLE

HOW TO CHOOSE CHEESE.

Expert Outlines a Way to Tell the Good From the Bad.

Various long lines are arranged from the
anchor of the battleship, and on these
lines men are held as they stand and
secure the cables. Special arms, or
“clam shovels,” are carried by the
crew, and these are used to pull
up the ropes which run over the
ramp. The ropes are divided into
cells, and each cell is marked with
a number.

The cables are then passed over the
castles, and the men in the
smoke-houses are now ready to
work. They are provided with
special arms, or “clam shovels,”
and are used to pull up the
ropes which run over the
ramp. The ropes are divided
into cells, and each cell is marked
with a number.

However, the men in the smoke-
houses are now ready to work.
They are provided with special
arms, or “clam shovels,” and
are used to pull up the ropes
which run over the ramp. The
ropes are divided into cells,
and each cell is marked with
a number.

After the cables have been
secured, the crew, armed with
special arms, are now ready to
work. They are provided with
