BATTLESHIP FLEET ARRIVED HERE IN FINE TRIM

SCHROEDER ON PEARL HARBOR

The Pearl Harbor naval station will soon be a model for the world, a事实, settled, arranged with a view to the best efficiency. This is the statement that Rear Admiral Schroeder has made in connection with the work of the Naval Board, of which he is the head, which concentrates its work here in the establishment of a naval station on the Pearl Harbor at Honolulu.

It is to be noted that the work of this board will get under way slowly after the fleet has been in the harbor, and that the fighting men are not expected to leave the ship. There are no naval stations in the world like the one planned for Pearl Harbor.

At Pearl Harbor the station has been already begun to go up, and a great deal of the station is to be a complete structure arranged in a homogeneous whole. In itself it is a work of art, a single structure, for three years before any other station has been worked on the details.

England's ships are already in the harbor and the station is in the making.

The station is to be a large, well-constructed building, and the station is to be a complete structure arranged in a homogeneous whole. In itself it is a work of art, a single structure, for three years before any other station has been worked on the details.
