"In view of the verdict of the jury, which found the defendant, Joseph M. Gauvette, to be mentally responsible at the time he killed his wife, no other course remains open for the court, whatever may be its views on the question of capital punishment, but to pass sentence. This is a duty that I very much regret to be called upon to perform, but one which becomes necessary under the circumstances."

in the clerk's office, is all she has to live on, except when the clerks from time to time "chip in" to help her out. According to officials of the county clerk's office, Mrs. Bower wants her husband back in order that her little child may be cared for and secure an education. She does not care so much for herself, but she wants financial help for her child. Judge Frater's divorce bill, now before the state senate, will, if passed, prevent people who secure a divorce from marrying within five years. In this manner he hopes to prevent such a case as that of Mrs. Bower, where, helpless and alone, she is forced to provide for the child of her divorced husband, while he goes absolutely free of care except for the \$10 alimony. County officials have thought of taking the child away from Mrs. Bower, in the hope that it could be better brought up under the care of the Charity Organization society. Judge Frater thinks if her child was taken away she would lose her mind.
