

NO WORD FROM WIFE AND CHILDREN OF CHICAGOAN MURDERED IN MEXICO

Mrs. John B. McManus and her children, Thomas and James.

No word has been received by her friends and relatives in this country from Mrs. John B. McManus, wife of the former Chicagoan and wealthy Mexican mine and ranch owner, who was killed in Mexico last week while trying to defend his property from Zapata's looters. When heard from last Mrs. McManus was at the Hotel Gevena in Mexico City with her four children, James, aged seven; Thomas, five; John, three, and Ruth, eighteen months old.

GRAVE NEED OF WAR MATERIAL

Chancellor Lloyd - George Points Out Necessity for Tremendous Increase in Output.

London, March 22, 6:40 a. m.—David Lloyd George, chancellor of the exchequer, placed grave emphasis upon the immediate necessity for a tremendous increase in the output of war material in an interview granted today by him to a representative of the Daily Citizen. He dwelt also upon the dramatic change which had come over great industrial relations as a result of the war and the value of confidence between labor and the state. The establishment of a labor advisory committee was regarded by Mr. Lloyd George as a step which may have almost incalculable results. He believed this was the first time such a thing had been done in any country, and said:

Labor Must Cooperate.

"It amounts to this: There is opening up a great new factor in the history of labor. If labor approaches this thing in a broad and generous spirit and not in a haggling spirit this document which was signed on Friday ought to be great chapter for labor."

"The next step will be the organization of all our resources for the production of munitions of war and without such an agreement this would have been impossible. This country would inevitably be deprived of victory in the war if labor had failed us. If by any mischance Germany should win, it would be the gloomiest day that ever dawned for labor and if this experiment fails I can imagine nothing more fatal to collectivist ideals in the future because the British people are essentially people who act on example and experiment rather than on argument."

FEDERAL LEAGUE CLUB INSOLVENT

Suit Brought to Place Indianapolis Branch in Hands of a Receiver.

Indianapolis, Ind., March 22.—Alleging that the Indianapolis Federal League baseball club is insolvent, Phiney W. Bartholomew, former judge of the superior court and a stockholder, brought suit today to place the club in the hands of a receiver. He alleges that, in addition to an indebtedness of \$75,000, the club is indebted to the stockholders for the non-payment of 6 per cent dividends on \$50,000 worth of stock.

Judge Bartholomew alleges that the club is losing money every day. He further alleges that he has been informed that the corporation controlling the club is about to dissipate its assets by transferring the club to unknown parties without providing for the payment to its stockholders of sums already due them. The case will be heard tomorrow.

DIVINE ORIGIN OF MORMON CHURCH

Elder James L. Barker, principal of the Weber academy, considered the subject of "Rational Theology" in the Third ward meeting house last night before a large congregation. His discussion was of an argumentative style and in it he brought up arguments made by atheists against the existence which, he said, could only be answered by Mormon doctrines.

The church, he stated further, that could best claim a divine origin should be the one that was following out, in the greatest degree, the social system instituted by Christ, and continuing he said that through its system of tithing, ward teachings, equality in membership and priesthood, baptism, vicarious work for the dead, the Church of Jesus Christ of Latter-Day Saints had proven its right to that claim, over that of any church in existence.

EXPERIMENT WILL BE MADE ON STREETS OF OGDEN

As a matter of experiment, superintendent of streets, Chris Flygare, states that he will repair the macadam surface of Twenty-fourth street one block this spring and cover it with oil, such as will be used on the canyon road. The material to be used is known as "Tarvia-B" and has been especially prepared for use as a dust preventive, and preservative on macadam roads.

Twenty-fourth street was macadamized a number of years ago between Washington and Quincy avenues, and it is said that the surface is in fairly good condition at this time. Mr. Flygare says that if repairing, and surfacing with oil is a success this year over one block, the entire distance may be treated in like manner next year.

SAW VOLCANO WHICH SOME DAY MAY BE DESTRUCTIVE

R. E. Bristol returned home yesterday from a two months' sojourn in the Hawaiian Islands and a several days' visit to the exposition at San Francisco. Mrs. Bristol remained in San Francisco to visit friends for a few additional days and will probably be home by the end of the week.

In speaking of the trip to the islands, Mr. Bristol stated that it is one of the most beautiful outings that could be taken anywhere on the globe with ocean bathing day and night, even in January. The active volcano "Kilauea" presents a wonderful attraction to tourists and this was visited several times by the Ogden man. Up to the present time, he said, there had been no apparent danger in visiting the volcano, but an eastern scientist, who is now studying it, made the statement to him that Kilauea was an "infant" volcano, and that when it attained its full growth, might prove very destructive.

The Bristols met quite a number of Ogden and Utah people at Honolulu, but the general report was that the tourist trade this year was comparatively smaller than in years past, reasons for this, it is thought, being that people are staying at home for business reasons or because they are fearful of being upon the water under the conditions brought about by the European war.

San Francisco, Mr. Bristol stated, is booming and the exposition is well worth anybody's time to see.
