

The after-effects of a cup of Postum Cereal

are good cheer and satisfaction. No frayed nerves, no unnatural wakefulness at night.

What wonder, then, that so many housewives serve Postum instead of coffee as the table drink!

Postum Cereal must be boiled fully fifteen minutes after boiling begins, to develop its full, rich flavor.

"There's a Reason" for Postum

Made by POSTUM CEREAL COMPANY
Battle Creek, Mich.

SUMMER FRÖCKS FOLLOW TAFFETA LINES

Summer frocks are carrying out the same lines as are now being worn in taffetas, as this new sketch from the metropolitan shops shows. Of course the big wide summer hat will rule supreme once the hot days get here, but it is surprising the number of small hats shown for summer for motor wear.

Conditions That Make for Success.
The poet said that only those who had eaten their bread in tears could know the veritable presence of the heavenly powers. There is a discipline in struggle, a drill in hardship, that is essential to the making of a man of truly virile fiber—the man qualified to take command, whose attributes of leadership are felt as soon as he appears.—Exchange.

Republican State Conventions For Election of Delegates to the Republican National Convention

Republican State Conventions for the election of eight delegates and eight alternates, to attend the National Republican convention at Chicago, June 8th, is hereby officially called to take place at Price, Utah, commencing at 10 o'clock a. m. on May 3rd. At that time there will be held, first a state delegate convention consisting of 597 delegates. This convention shall proceed to elect four delegates from the state at large and likewise four alternates. Following the adjournment of this convention, a convention of the First Utah Congressional district will convene at the same place. This convention will consist of 323 delegates from the following counties: Beaver 10; Box Elder, 28; Cache, 42; Carbon, 13; Daggett, 1; Duchesne, 8; Emery, 10; Garfield, 7; Grand, 2; Iron, 10; Juab 14; Kane, 4; Millard, 15; Morgan, 5; Piute, 3; Rich, 4; San Juan, 3; San Pete, 32; Sevier, 19; Summit, 13; Uintah, 8; Wasatch, 8; Wayne, 3; Washington, 9, and Weber, 52.

At 2:30 p. m. the same day a convention of the Second Utah Congressional District, consisting of 274 delegates will be held at another hall. This convention is authorized to select two delegates and two alternates from the counties constituting this district to attend the Chicago convention on June 8th next. The Second Congressional District Convention shall consist of 274 delegates from the following counties: Salt Lake, 188; Tooele, 13; Utah, 55; Davis, 18.

The delegate representation of both of these districts constitute the 597 delegates qualified to take part in the state convention.

By order of Republican State Committee,

HENRY WELSH,

Chairman.

C. L. NELSON,

Secretary.

CHICHESTER'S PILLS

HEADED WEST

Robert H. Bean, president of the American Acceptance Council who recently toured Minnesota, and the Dakotas, sees in the activities of the Nonpartisan League, danger to the principles of our government. Mr. Bean says:

"I have been up in a section of the country that it seems is almost set off by itself, a region where school, counties, yes, and even congressional districts, are completely controlled by an organization, where banks and business institutions are owned by a political organization, and that is the Nonpartisan League. It is like a piece of candy on a stick, covered on the outside with pure, clean sugar, and on the inside a rank poison.

It is headed west with its resources of money and an organization that insidiously intrudes itself into the confidence and gains the support of that class of people who do not think for themselves. And I want to tell you that there is no organization better equipped to exert its power and spread its influence. It is a deadly parasite that fastens itself upon a community and fattens upon the resources of the sections in which it is planted. It appeals to the farmer with promises of high prices for his products and alluring promises of benefits to be derived, and it appeals to the laborer with hopes of higher wages. That is the experience of Minnesota and the Dakotas."

Particularly is the Nonpartisan League seeking to extend its socialistic plans in Colorado, Montana, Minnesota, Idaho and Washington.

Woman's Reserve Power.
Nobody else can leave the impression of holding a reserve so much detailed knowledge of the utmost importance as a neighbor woman who tells you that some other neighbor woman concerning whose health you inquire is doing as well as could be expected.—Onto State Journal.

Advertis in the Republican.

LEONARD WOOD AND HIS FRIENDS.

These boys are not afraid Leonard Wood will send them to war if he is made president, despite the gloom of the professional politician. The picture was taken in Buffalo, New York, when the Hutchinson school students overwhelmed Wood after his speech there.

BANKS AND INDUSTRY

More and more do we see the progressive bank of today making the question of industrial development a personal matter.

The wide awake bank management knows that bank property depends on two kinds of accounts, individual and industrial.

Individual account will be lacking if there is a lack of industrial activity. Therefore it is directly to the interest of every bank to push community development and thus by indirect develop its own business.

All over the country we see this thought reflected in bank advertising. Illustrating this point take the following paragraph from a recent advertisement of the Northwestern National bank, Portland, Oregon, in which it points out advantages of increased water power development:

"Increased soil production as well as greater industrial production, will be the fruits derived from the development of our 'white coal.' Cheap power will enable irrigation projects

to pump water to our arid lands and reclaim them to fertility. Power will be used to do a great share of the drudgery on farms and will offer every farmhouse the electrical conveniences found in a city home."

This bank is developing the industrial idea which means prosperity for all.

TO THE DYSPEPTIC

Would you not like to feel that your stomach troubles are over, that you can eat any kind of food that you crave? Consider then the fact that Chamberlain's Tablets have cured others—why not you. There are many who have been restored to health by taking these tablets and can now eat any kind of food that they crave. Adv

Food Value of Oatmeal.

The value of oatmeal as a human food is established by Drs. H. C. Sherman, J. C. Winters and V. Phillips in the Journal of Biological Chemistry. But it needs milk in addition, and the two together can furnish a man with all the protein he needs.

NECESSITY WILL FORCE ISSUE

"Actual hunger may face a large proportion of the American people if Congress does not do something to readjust agricultural conditions in this country," Senator Capper, Republican of Kansas, declared in the Senate recently, in discussing the pending agricultural appropriation bill.

A land slide of farm labor to the industrial centers is threatening a growing food shortage which, unless checked will render the farmers powerless to supply the food demands of the nation, Capper warned.

We can't stop our present farm labor leaving the farms for the cit-

ies but we can adopt measures which will prevent the importation of farm labor to this country under proper restrictions.

Ultimately, necessity will force the issue for we must eat and the farmers cannot feed the nation without help to do it.

Maryland in History.

The city of Baltimore was founded in 1728, Frederick in 1745 and Georgetown in 1751. Maryland played an honorable part in the Revolutionary war, and in 1783 congress met at Annapolis, where, on December 23, after the conclusion of peace, Washington resigned his commission as commander in chief. In the war of 1812 the state suffered severely. Fort McHenry was bombarded by the English fleet in September, 1814, this battle being the occasion for the writing of "The Star-Spangled Banner" by Francis Scott Key.

U.S. NAVY

Jack's Reading Room.

The men's quarters on our new battleships are more luxurious than the Admiral's quarters of fifty years ago. This is a corner in the reading room of the U. S. S. New Mexico. A big library and complete file of current magazines, as well as newspapers from all the large cities, help to take care of any stormy hours when Jack may not prefer to be on deck.

A good title for this picture would be, "Why boys leave home," and the best part of it is that they come back real men.

THE U.S. NAVY

Passing Through the Canal.

The U. S. S. Wyoming and the U. S. S. New Mexico are shown here passing through the Pedro Miguel locks of the Panama Canal.

The electric engines along the side of the locks are called "mules" in deference to their four legged predecessors—they have just hauled the battleship through the locks. If you are interested in mathematics you might figure out how many old style mules it would take to do the job.

The Wyoming at the left, is moving out to the lower level, and as soon as the water in the other lock is let out to the correct level the New Mexico will move ahead.

This picture was taken from a U. S. Navy flying boat, during the recent trip of the Pacific Fleet to the West Coast. They were royally received at all of the ports along the trip.

PAINT IS CHEAPER THAN REPAIRS

Buildings worth building are worth paint protection

On the farm every building represents invested earnings—the foundation for future earnings.

Surely such buildings deserve real paint protection—the protection that Endurance Paint is designed to give. This paint will add years to the life and dollars to the value of everything on the farm—not only to barns and buildings but also to machines and implements.

Endurance Paint is easy to apply. The name on the package is your guarantee of pure linseed oil, pigments, colors and thinner chemically correct and properly mixed. Each can bears full directions which if followed will insure the best possible results.

The faultless film of Endurance Paint will protect any surface around the farm. Whether wood or metal it will defy the weather and the ravages of time. Its quality insures its long life.
