

Demolishing of the Battleship San Marcos, Formerly the Texas, In Chesapeake Bay.

THE SAN MARCOS BEFORE THE ATTACK

SHELLS DROPPING INTO THE WATER AROUND THE BATTLESHIP

AFTER SHE HAD BEEN RIDDLED WITH SHELLS. PHOTO'S COURTESY BY AMERICAN PRESS ASSOCIATION.

The total wreck of the San Marcos by the big guns of the battleship New Hampshire proved that Uncle Sam navy has the best system of training. Every shell landed just where it was wanted and where it was directed. actual battle every living thing aboard the San Marcos would have been destroyed.

FARM NOTES

Oats and corn, especially, do well after beets.

Manure is a valuable by-product—don't waste it.

Filth and vermin go hand in hand—so excuse for it.

The early garden is usually the best and most satisfactory.

When you have decided on your seeds, order them at once.

Castor oil is a splendid lubricant for vehicles and other farm machinery.

A silo does not greatly change the character of the nutrients in the corn plant.

Surely the farmer who begrudges his bees a little time and care is ungrateful.

Small grains will do well when seeded on fields preceded by sugar beets the year before.

Better and cleaner seed is a good maxim—get a fanning mill. They save their cost in one season.

When you are thinking of buying a farm remember the water is an important item for your live stock.

When you are manuring don't be stingy—a good manure spreader is putting money in the bank later on.

When the corn crop is cut and put into the silo the field is cleared and made ready for fall wheat or rye.

By the use of the silo practically the entire food value of the corn crop is saved, made succulent and very nutritious.

Study the wants and conveniences of the home for the benefit of your wife and children just as carefully as you do your own.

Cold frames are handled the same as the hot beds, the only difference is that not much manure is used and that they are later.

The Sound Sleep of Good Health

Can not be over estimated and any ailment that prevents it is a menace to health. J. L. Southers, Eau Claire, Wis., says: "I have been unable to sleep soundly nights, because of pains across my back and coarseness of my kidneys, and my general condition was much run down. I have been taking Foley Kidney Pills but a short time and now sleep as sound as a rock. I know that Foley Kidney Pills have cured me." Coop Drug Co.

Adapted for High Altitude.

It is a familiar fact that living at high altitude puts a strain on the heart, which has more work to do. In this connection, says Knowledge, it is interesting to notice Strohl's recent comparison of ptarmigan from high altitudes and willow grouse from the plains. He found that in ptarmigan, even in the young bird, the right ventricle of the heart is very distinctly stronger than in the willow grouse, a specific adaptation to the difference of habitat.

Little Willie Again.

"Pa!" came little Willie's voice from the darkness of the nursery.

Pa gave a bad imitation of a snore. He was tired and did not wish to be disturbed.

"Pa!" came the little voice again.

"What is it, Willie?" replied his father, sleepily.

"Tum in here; I want to ast you sumplin'," said the little voice.

So pa rose up from his downy and, putting on his bath-robe and slippers, marched into the nursery.

"Well, what is it now?" he asked.

"Say, pa," said little Willie, "if you was to feed the cow on soap would she give shaving-cream?"—Harper's Weekly.

Chinese and Vaccination.

"Unless it is absolutely necessary I never like to get a Chinaman started on the vaccination game because he never knows where to stop," said a missionary. "He fights against the initiation with all the stubbornness of his oriental nature, but once he becomes convinced of the efficacy of vaccine virus he goes on the principle that you can't get too much of a good thing and wants a dose of it for every ill that besets him. The Chinaman who has been once vaccinated wants it done all over again every time he gets a bad headache. It is pretty tough on Chinese children whose parents have formed the vaccination habit. If the missionaries and doctors didn't watch out their little arms would be in a state of eruption half the time."

Foley Kidney Pills contains in concentrated form ingredients of established therapeutic value for the relief and cure of all kidney and bladder ailments and urinary irregularities. Foley Kidney Pills are antiseptic, tonic and restorative. Refuse substitutes. Coop Drug Co.

A Poor Job.

"Yes, sir," said the great financier, proudly, as he flicked the ash from his 18-penny cigar, "I am the architect of my own fortune." "Well," rejoined the friendly critic, "all I've got to say is that it's a lucky thing for you there were no building inspectors around when you were constructing it."—Exchange.

SHERIFF'S SALE.

In the District court, Cache County, Utah.

Hyrum B. Anderson, plaintiff, vs. May R. Edwards, Jennings Edwards, Faris Edwards, Robert Edwards, Paul Edwards, J. W. Anderson, administrator of the estate of Samuel Anderson, deceased, and James H. Nielsen, defendants.

To be sold at sheriff's sale on the 29th day of April, 1911, at 12:00 o'clock noon of said day, at the front door of the court house in Logan City, Utah.

All that portion of lot 4, block 15, plat "A," Hyrum City survey, described as follows: Beginning at a point 3 rods west of the southeast corner of said lot, and running west on Main street 66 feet; thence north 5 rods, thence east 66 feet; thence south 5 rods to place of beginning.

Also a joint interest, with others in and to the use of 12 feet of land in width, extending along and adjoining the north end of the above described land, and continuing in a westerly direction to the street line on First West street, as a right of way for a wagon road.

N. W. CROOKSTON, Sheriff Cache Count, Utah. J. C. Walters, attorney.

GOOD ROAD ERA HAS BEGUN

Once Constructed, Highways Should Be Looked After Regularly—Dust Preventative Is Needed.

The good road era has begun in many states, and already the steam roller, the piles of crushed rock along the roadside and the digging out of the original roadway are familiar sights in many of the eastern states. The roads built are generally of approved macadam construction, which, completed, are perfect strips of white ribbon running through the green fields and hills of the rural sections.

These roads are perfectly built, and as soon as completed the farmers and other ratepayers contentedly sit back and exclaim: "These roads are now good for a generation or more without trouble." This is a serious error, and one being made in many states. That it is an error is borne out by the dust cloud raised by a passing car traveling at 20 miles per hour, or perhaps faster.

Many fail to realize that whenever dust is raised a road is being destroyed, says the Motor Age. This is particularly the case on smooth macadam surfaces, where there is nothing to hold the dust on the road, and where every cross wind blows off any loose material.

As soon as roads are built arrangements should be made to keep them in repair. With roads it is essentially "A stitch in time saves nine." Some dust preventative should be used immediately macadam roads are completed, in order to prevent dust.

Oil, tar and many special preparations are now on the market, and the communities should be educated to looking upon these additions as a legitimate part of the road maintenance. California has its oiled roads over which motoring is a pleasure to the motorist and not a dust-bath to the citizen who happens to be on the road the same day, or who has the misfortune to reside along a well-traveled highway.

Massachusetts proved last year that road treatments are a success and more economical than continuous applications of water; and in England dust preventing is always considered a part of the road problem.

Prisoners Honored Confidence.

When the circus exhibited in Montpelier, Vt., recently, there was no work for eleven prisoners in the jail. The sheriff purchased tickets for them and allowed them to see the show without an escort. Some had long terms to serve and the crowd and darkness furnished an excellent opportunity to escape. Fifteen minutes after the performance was over every one was back where he belonged.

Greatest Thing in Life.

Neither rich furniture, nor abundance of gold, nor a descent from an illustrious family, nor greatness of authority, nor eloquence and all the charms of speaking, can produce so great a serenity of life as a mind free from guilt, kept untainted, not only from actions, but purposes, that are wicked.—Plutarch.

Farm and Road Improvement

TRAY IS GOOD SEED TESTER

Device Enables Seed Grower to Determine on What Mixture of Soil is Best Suited.

One of the most ingenious devices for the testing of seeds yet put out is that designed by a Minnesota man. It enables a seedgrower to determine which mixture of soil is best suited to a particular seed. A tray has a layer of some moisture retaining material in the bottom, and on top of this is a removable cover with a number of holes, all numbered. Little conical cups, open at the bottom, fit into these holes and the cups are filled with different mixtures of soil, having different proportions of loam, etc. In these different soils seeds are planted, and

Tray for Testing Seeds.

by keeping a record of the numbers the growers can tell which soils are best suited to his various purposes. The moistening pad in the bottom of the tray keeps the soil moist and obviates the necessity of watering it daily, besides keeping all the uniform degree of moisture.

Life's Limitations.

"Our present horizon is our greatest reach of sight, but unless we make our way toward it we shall never find a farther reach."

Movement of the Air.

The movement of air is variously designated, according to its velocity, as a zephyr, breeze, wind, gale or hurricane. With fogs the designations are mists, slight, moderate or thick. A dense or thick fog, according to the weather bureau, obscures objects at a distance of 1,000 feet.

Selecting Good Cow. When a man attempts to select a good cow by some theory that has been fostered and cherished as an idle dream, he is going against the prescribed rules that have been forming for generations and his success will be discouraging.

Strange. Mr. Marrynew (a little crossy)—This soup, Agnes, doesn't seem to taste much like turtle. Mrs. Marrynew—I don't see why, John, I let the turtle swim around in the kettle until the water was nearly hot enough to scald the poor little thing!—Paek.

WEIGH YOUR BREAD AND SEE IF IT COMES TO A POUND.

The Cosy Corner Bakery guarantees each loaf to weigh 16 ounces. Can others show this standard. It is the best home-made bread on the market today. Made from good, wholesome flour. Cosy Corner Bakery Bread is the acme of perfection. Wagon deliveries to the country twice a week.

COSY CORNER BAKERY
Both Phones. All kinds of Pastry.
