**Falrhope**

*Valve Leaky, Engine Bad, Batteries in Poor Condition, Wrote Commander F. J. 4 JUST BEFORE SUBMARINE WAS LOST*.

Falrhope, valve engine breakdowns, battery explosions and bad motors were investigated in a letter just received from Los Angeles by Allan E. Bide from the Engineer, Coast. Alfred L. Bide, commander of the submarine F.J. 4, which sank in Honolulu harbor at March 15, is describing the condition of the boat. A rolled presentation of facts was also contained in the letter, which was written three days before the submarine met disaster. The accompanying pictures have just been rescued from Falrhope. At the right is the last picture taken of the F.J. 4. The other photographs show a close view during a short halt to search the sea depths for the submarine. The photo was taken from the vicinity of California.

**FASHIONS IN NOTE PAPER**

There are fashions to note paper and mailing cards. Just as in everything else, fashions are a sign of times. One of these fashions strikes a person as "well dressed," another as "impossible," but is there a fashion, however primitive, that is not? The word "fashion" is a petty word, using only a part of the period for the present time. To be "dressed," "well dressed," or "impossible," is a word of the past, referring to the former times. The word "fashion" is not a word of the present time. It is a word of the future, only. It is a word of the present time. It is a word of the future, only.
