Radical Departure From Their Policy

CANADIAN RAILROAD MAN HONORED BY ANGLO-FRENCH COMMISSION ABOVE AMERICANS.

By Associated Press.
NEW YORK, Sept. 13.—The Anglo-French financial commission here, seeking a loan of half a billion to a billion dollars, made a radical departure in its policy of having interested American financiers call on them at their headquarters and present their views to the commission, by going to James J. Hill, the dominant railway and commercial factor in the northwest instead of waiting for Hill to come to them. No other American has been so honored thus far.

Straight Loan Wanted.
NEW YORK, Sept. 13.—The present plan of the Anglo-French financial commission is to borrow \$100,000,000 on straight British and French government bonds without collateral, is the report. The entire amount will be spent in the United States for cotton, wheat, meat and munitions. Financial authorities classify it as a commercial loan.

THE DEATH TRAP OF 22 MAN-O'-WARSMEN

The Journal-Miner today presents, through the courtesy of the Los Angeles Evening Herald, to its readers the first picture printed in Arizona of the American submarine F-4 since the raising of that ill-fated undersea craft at Honolulu. The F-4, which dived in a practice maneuver off Honolulu harbor March 25 and failed to rise, contained 22 man-o'-warships. All these met death. They were under command of Lieutenant Ede. For months every effort by United States naval experts failed in the attempt to bring the wrecked submarine to the surface. Great holes were torn in her steel hull by the grappling hooks which were used to raise her. Finally cables were slipped about her and air-tight pontoons were placed on either side of the wreck. These pontoons were filled with water and they were sunk to the level of the surface. Then the water was pumped from them and the force of the air raised the sunken vessel. In the accompanying picture the F-4 is shown just after she was towed into drydock at Honolulu. On either side of her the air-tight pontoons are to be seen, resembling barrels. At the right of the submarine, the stern of which faces toward you, can be seen one of the gaping holes which the grapplers tore in her hull. The arrow points to where the bodies were found in the wrecked diver.

TURKS' POSITION AT DARDANELLES PRECARIOUS

TRUSTWORTHY ADVICES SAY THAT THEY WILL NOT BE ABLE TO HOLD OUT MUCH LONGER.

ATHENS, Sept. 13.—An American citizen of standing here received today advices from Constantinople which he says are trustworthy, saying that the present situation of the Turkish army is highly unfavorable. According to this information the position of the Turks defending the Dardanelles is precarious and the Turkish position at sea is described as disadvantageous.

The former German cruisers Goeben and Breslau are said to be incapacitated, while the Russian fleet preys unrestrained upon the Turkish shipping.

The information says further that Turkish affairs are in the control of a triumvirate with autocratic powers consisting of Enver Pasha, minister of war, Anarat Bey, minister of the interior, and Bedri Bey, chief of police of Constantinople. Dissatisfaction among the Moslems is reported and it is said that the Shiek Ul Islam was dismissed because he disapproved the measures taken against the Armenians.

The committee on union and progress, is said to have been virtually superseded by a secret committee responsive to the wishes of the triumvirate. It is said that the Armenians have been shipped to concentration camps and that the earlier massacres of Christians have been duplicated.

By Associated Press.
LONDON, Sept. 13.—Von Hindenburg's army has finally succeeded in setting foot on the Rovno-Petrograd railway, between Vilna and Dvinsk, the Russians being forced back to the lake district, where they are making a stand. With the railway in the hands of the Germans the Russians are compelled to make further retirement, although their offensive in Galicia may save them by compelling the Germans to send reinforcements.

The condition of the troops is terrible, the country virtually being under water. Russian accounts say 30,000 prisoners were taken along the river Sereth.
