The Tench, (Tinca Tinca to youse scientists), is noted for it's tenacity of life in oxygen depleted waters. The family Cyprinidae or Minnows claims the Tench as her most distinguished member. Many having attained a length of one and one-half feet and a weight of six to eight or even twelve pounds—which is "big potatoes" in the minnow world.

Fashionable "Tillie Tench" varies her wardrobe according to the waters she inhabits. She commonly dons a dark olive green shading into black with a remarkable transparent lustre. Her come hither ensemble finds her fins flesh colored and dark spots over a golden background.

Now all most minnows can wish,
Is to grow up to be a fish.

But "Tillie" is swinging on a star,
And the SS 417 will soon spread her
fame from here to thar.

The Officers and Crew of the U.S.S. Tench

cordially invite

to their Commissioning Party

Wednesday Evening, October 4, 1944

at the Club Pannaway, Portsmouth, N. H.

Guest of.....
