MR. EDITOR:-In regard to tests with tuberlin of which much has tinue until otherwise ordered by the were awarded prizes of \$10 each: Board of Health.

practical method of diagnosing tuberculosis, in the early as well as in the later stages, that is in the possession of mankind. In the Sixth Biennial Report of the State Veterinarian of Michigan, 1895-1896, E. A. A. Grange, State Veterinarian, a practicing veterinarian for the past 20 years and now principal of the Veterinarian Department of the Detroit College of Medicine, has a report that is very extensive and covers a great deal of ground on the subject of tuberculosis and the use of tuberculin.

The tuberculin test has proven accurate in diagnoising bovine tuberculosis in the United States. The United States Veterinary Medical Association was led to adopt the following resolution, at their meeting held at Buffalo, N. Y. in 1896:

"Whereas, Tuberculosis of some of our domestic animals, and especially of cattle, is a wide spread and destructive disease; and

"Whereas, The statistics accumulatdisease is very prevalent throughout point blank up to 800 yard. this country, especially in the dairy herds, indicating that it is steadily increasing, except in States where active measures for its suppression have been enforced; and

"Whereas, There exists in some quarters a difference of opinion as to the relation of tuberculosis among cating that this matter has been the object of careful scientific inquiry by a great number of eminent scientists in all parts of the world, and that reliable and uniform observations are recorded in great numbers in the veterinary and medical literature by it;

"Resolved, That it is the opinion of the United States Veterinary Medical Association that the following points have been demonstrated beyond dispute, and may be accepted as fully established:

"First, that tuberculosis of man and cattle is identical,

"Second, that the milk from cows "Third, that the milk from cows with extensive tuberculosis, but apparently healthy udders, may, in some cases; contain the germ of tuberculosis

and cause the disease in animals fed

"Fourth, that in some cases the germs of tuberculosis appear in the milk of tuberculosis cows that are not far advanced in the disease and of others that are healthy, so far as cows be determined by an examination made | Track for Makiki-Sailor Friends.

during the life of the animal. "Fifth, slightly tuberculosis cows sometime succumb to the the sudden exacerbation of tuberculosis and fur-

"Sixth, tuberculin furnishes incomtuberculosis in the living animal.

"Seventh, tuberculin, properly used harmless to healthy cattle and is so of diagonising internal diseases.

riuarian and those that are condemned night. should be disposed of in such a manner that it will be impossible to put them on the market for consumption as human food.

and municipal and health authorities should at once perfect a system of commensurate with the vast import-

ance of the subject. "Resolved, That the live stock, and especially the breeding interests of this country, can never regain their and State Government as will afford some reasonable guaranty against the continued ravages of this disease. And in view of the prevalence of bovine tuberculosis in foreign countries and the measures taken by some of them to protect their cattle from inspection, the United States should prohibit the importation of breeding animals until they have been proven by the tuberculin test to be free from the disease."

Respectfully yours, W. T. MONSARRAT, V.-S., Agent Board of Health.

### 200 YEARS.

### Anniversary of Founding of a Missionary Society.

The Bishop of Honolulu held a contle to the public health, notwithstand- ference with his clergy yesterday, at St. Andrew's Cathedral, to consider the steps that should be taken to commemorate the two hundredth anniversary of the founding of the Society for the Promotion of Christian Knowledge.

The Diocese of Honolulu has benefited largely by the liberality of this society and it was felt that a srong effort should be made to celebrate the o'clock before the last guest had deattainment of the society's two hundredth birthday in a fitting manner.

It was decided that a public meeting should be held in the Cathedral the Society of Daughters and the child- nolulu were there and every one seemschool room on Tuesday, March 8th, ren of American Revolutionary So- ed to enjoy the pleasant function to with tuberculosis udders may cause tuberculosis in animals fed upon it and history of the society and its connection with the work of the church the captains of the two American warin these Islands.

The speakers have not been finally settled upon, but arrangements are in progress and it is hoped that a meeting worthy of the occasion will be secured.
